

Dear FWB participant,

With the T7 5.0 Cash Market go-live fast approaching, we kindly remind you to participate in the integrated simulation environment and to test various scenarios to ensure your readiness. Please note that since 8 May 2017, it is possible to order sessions for production via the Member Section.

To ensure a successful readiness, please answer the questionnaire about your planned infrastructure in our short [questionnaire](#).

As of 9 May 2017 the following functionality in the T7 Trading Interfaces ETI and FIX Gateway will be activated – for the handling of mass cancellations in the Cash Market, a new group “AffectedOrdGrp“, will be introduced. The following T7 Release 5.0 documentation has been updated accordingly:

Trading Interfaces

- T7 Enhanced Trading Interface Manual v1.3 (simulation version)
- T7 Enhanced Trading Interface – Cash Message Reference v.5.0 (simulation version)
- T7 Enhanced Trading Interface XSD XML representation and layouts
- T7 FIX Gateway FIX 4.2 and 4.4 Manual v3.0
- T7 FIX Gateway – Fiximate (simulation version)
- T7 FIX Gateway – Repository (simulation version)

Network Access

- Network Access Manual

We would also like to give you an overview of the upcoming Focus Days. A simulation calendar (CSV), which includes all Focus Days and further relevant information, can be found on the [Xetra website](#).
