Distribution policy	Accumulating
Fund domicile	Ireland
Benchmark	MSCI USA (NR)

Investment Objective

The CSIF (IE) MSCI USA Blue UCITS ETF is a physically replicated, Irish based ETF. The investment objective is to replicate the reference index as closely as possible and to minimize performance deviations from the benchmark. The MSCI USA Index is designed to measure the performance of the large and mid cap segments of the US markets. The ETF is unhedged.

The fund follows the exclusion recommendations of the Swiss Association for Responsible Investments (www.svvk-asir.ch). The recommendations affect issuers whose conduct or products violate the normative criteria of SVVK-ASIR, e.g. violations of international conventions or production of controversial weapons. This fund is not a sustainable fund and it does not integrate any environmental, social and governance (ESG) considerations into its investment process. The fund does not meet Credit Suisse Asset Management (CSAM) Sustainable Investing Policy, nor any specific client or investor sustainability preferences.

Investing involves risk including the risk of loss of capital. Past performance does not predict future returns. Neither simulated nor historical performance is a reliable indicator for current or future performance.

Performance overview - monthly & cumulative

since 01.01.2024

Performance overview - cumulative

since 01.04.2020

Figures shown include the deduction of the maximum sales charge of 5% in the first year of investment and maximum redemption charge of 3% in the last year of investment.

Potential Risks

The ETF's risk and reward profile does not reflect the risk inherent in future circumstances that differ from what the ETF has experienced in the recent past. This includes the following events which are rare but can have a large impact.

- Liquidity risk: Assets cannot necessarily be sold at limited cost in an adequately short timeframe. Part of the ETF investments may be prone to reduced liquidity during certain circumstances.
- Operational risk: Deficient processes, technical failures or catastrophic events may cause losses.
- Political and Legal risks: Investments are exposed to changes of rules and standards applied by a specific country. This includes restrictions on currency convertibility, the imposing of taxes or controls on transactions, the limitations of property rights or other legal risks.

This section is not exhaustive, for more risks, please refer to the Prospectus.

The product's investment objectives, risks, charges and expenses, as well as more complete information about the product, are provided in the prospectus and KIID (or relevant offering document), which should be read carefully before investing.

Investors may lose part or all of their invested amount.

The full offering documentation including complete information on risks may be obtained free of charge from a Credit Suisse client advisor, representative, or, where applicable, via Fundsearch (credit-suisse.com/fundsearch).

The investment promoted in this marketing material concerns the acquisition of units or shares in a fund and not of any underlying assets. The underlying assets are owned by the fund only.

Risk profile²

PRIIP SRI

Larger values (up to 7) indicate higher risk while lower values (up to 1) indicate lower risk.

² The risk indicator assumes you keep the Product for 7 years. The actual risk can vary significantly if you redeem at an early stage and you may get back less. The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets. Be aware of currency risk if your reference currency differs from the currency of the Product. You may receive payments in a different currency, so the final return you will get depends on the exchange rate between the two currencies. Investors shall note that the Product may be exposed to further risks such as operational, counterparty, political, sustainability and legal risks that are not included in the Summary Risk Indicator. This Product does not include any protection from future market performance so you could lose some or all of your investment.

Glossary

Accumulating	Indicates a regular reinvestment of the dividends received in the portfolio itself
Beta	A measure of the volatility, or systematic risk, of a single security or fund in comparison to the market as a whole.
Distribution policy	Indicates whether the ETF distributes or reinvests the dividends received from underlying securities (Accumulating)
Ex post	Refers to metrics based on historical data
GICS	Global Industry Classification Standard
ITD	Inception-to-date
MTD	Month-to-date
NAV	Net Asset Value
Ongoing Charges	The calculation of the ongoing charge is based on the Committee of European Securities Regulators/10-674 Directive. For a maximum of 12 months from fund fiscal year end and since inception, the ongoing charges figure is based on estimated expenses. After that, the ongoing charges correspond to the TER of the last annual report. It excludes performance fees and portfolio transaction costs, except in the case of an entry/exit charge paid by the fund when buying or selling shares/units in another collective investment undertaking.
QTD	Quarter-to-date
Sustainable Finance Disclosure Regulation (SFDR)	Regulation (EU) 2019/2088 of the European Parliament and of the Council of 27 November 2019 on sustainability-related disclosures in the financial services sector
TNA	Total Net Assets
Tracking error	Measure of the deviation of the return of a fund compared to the return of a benchmark over a fixed period of time.
YTD	Year-to-date

Warning statements

Asset breakdown	Indicative allocation may change over time. All holdings are shown strictly for information purposes only and do not constitute investment recommendations of Credit Suisse. Please note that this does not constitute an offer or a solicitation to buy or sell any interest or any investment.
Performance start date	Performance calculation and presentation start with the first full month of an invested strategy. This can lead to a difference in launch and performance start dates.
PRIIP SRI	The Summary Risk Indicator is a guide to the level of risk of this Product compared to other products. It shows how likely it is that the Product will lose money because of movements in the markets.
