- 4 Feedback and Reporting

Correction Procedure

1. Retrieve Reports:

- Access TR170 & TR171 reports from the CRE / Upload GUI
- 2. Prepare Correction:

Prepare upload file: Create correction upload files using the example upload file and filling in necessary data for missing SCs and incorrect LCs, while using data from the TR170 and TR171 as basis.

3. Upload Corrections:

- via Common Upload Engine (CUE): Use upload services (EXTREFDA for missing SC registrations, EXTREFDH for Long Code corrections) for submission.
- o via Upload GUI: Upload the prepared correction file or use the eForm to submit correction data

Steps

Please check "Useful links" (slide number 18) for the detailed information about the documentation.

Report provision

CRE

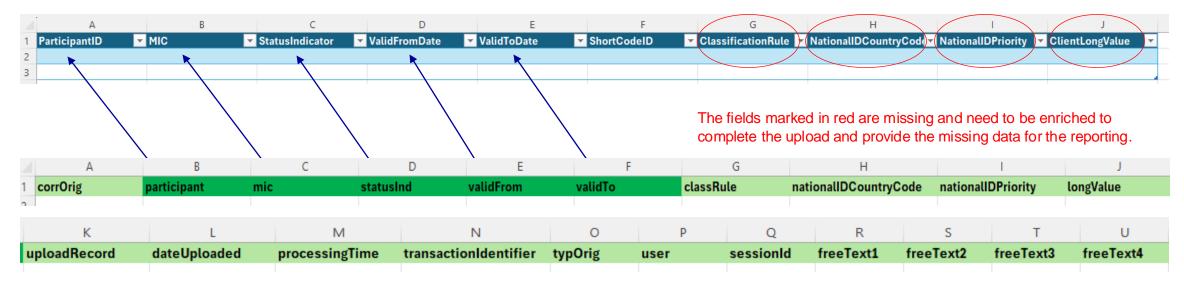

• TR170 and TR171 reports are provided under the following path: <MemberID>/<System Type (P|S)>/<MIC>/<Date folder>

GUI

TR170 and TR171 reports are available under the report download section in the GUI

Upload File Creation for Missing Short Code Data

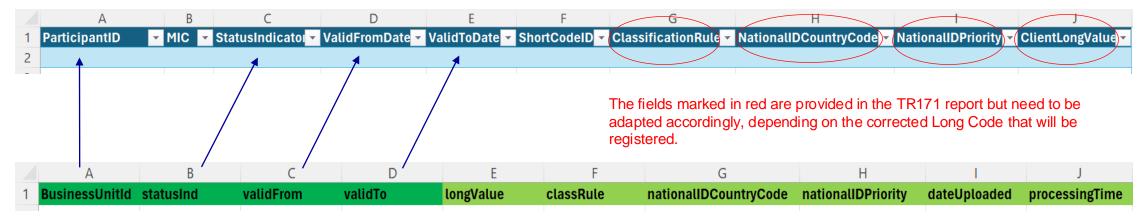

Upload file converted from CSV to XLS

- TR170 report converted from XML to XLS for illustration purposes
- The SC is presented in the report prior to the details shown above and can also be copied over for the upload
- The light green fields are information only fields and can be used to identify the correct transactions in the database to retrieve the missing information

Upload File Creation for Incorrect Long Codes

Upload file converted from CSV to XLS

- TR171 report converted from XML to XLS for illustration purposes
- The SC is presented in the report prior to the details shown above and can also be copied over for the upload
- The light green fields are representing the Long Code data that needs to be corrected. Depending on the correction certain fields can be taken over but other might need to be adapted to be in line with the new Long Code².

11

² Please check "Useful links" (slide number 18) for the detailed information about the documentation.

Provision of Corrections

Missing Short Codes

- Correct missing SCs using the TR170 report
- Submit data with Status Indicator "C" in the regular upload file
- Use the CUE upload Service EXTREFDA for submission via CRE or Upload GUI
- Please comply with regular file naming conventions

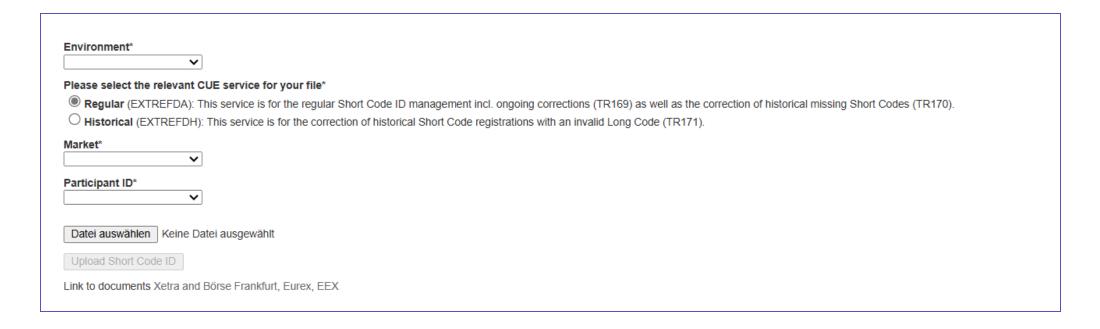

Incorrect Long Codes

- Correct missing SCs using the TR171 report
- Submit data with Status Indicator "C" in the regular upload file
- Use the new CUE upload Service EXTREFDH for submission via CRE or Upload GUI
- Please comply with the file naming conventions outlined in the Reporting Manual, section 3.4.2.4

Please check "Useful links" (slide number 18) for the detailed information about the documentation.

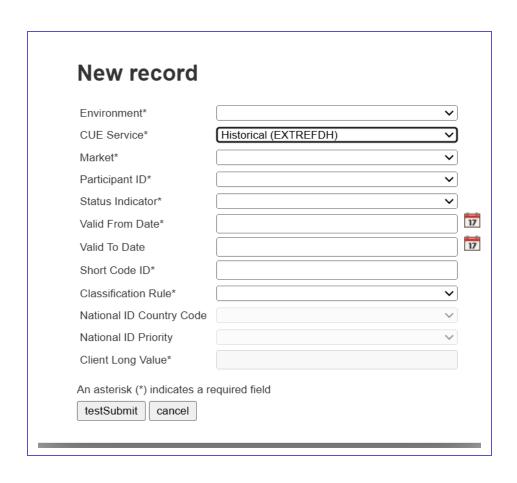

Upload Process of Correction Files via the Upload GUI

The Upload GUI provides you in the file upload section with the selection for the upload service:

- For uploads of short code registrations that were missing (based on TR170 data), please select the "Regular" upload service (EXTREFDA)
- For uploads of Long Code corrections (based on TR171), please use the "Historical" upload service (EXTREFDH)

Upload Process of Corrections via the Upload GUI eForm

The Upload GUI provides you also with the ability to upload historical corrections via the eForm:

- For uploads of short code registrations that were missing (based on TR170 data), please select the "Regular" upload service (EXTREFDA)
- For uploads of Long Code corrections (based on TR171), please use the "Historical" upload service (EXTREFDH)
- The upload data can be retrieved from the respective Report (TR170/TR171) and needs to be enriched with the missing information, e.g., information from "Valid From Date" and "Valid to Date" field should be taken over.

- 1 Background and Timeline
- 2 Initial Correction Scope
- **3** Correction Procedure
- 4 Feedback and Reporting

Feedback and Reporting

Reports

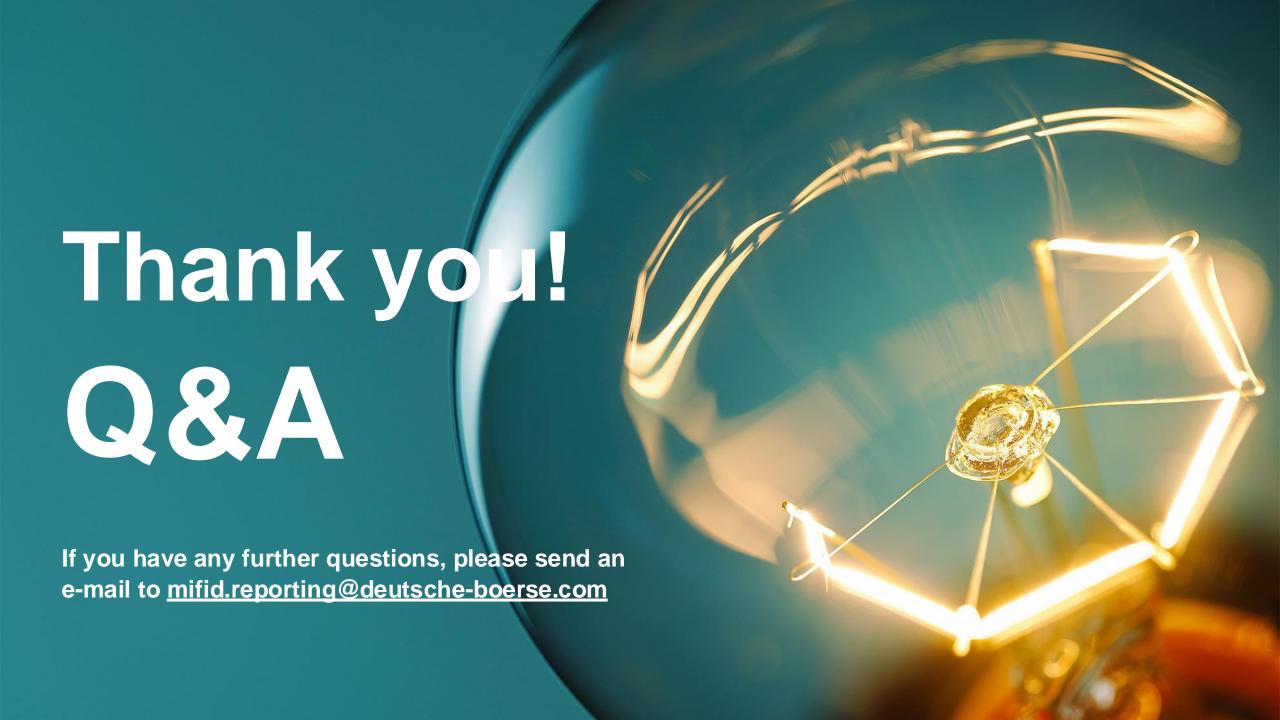

- TR169 Short Code ID Correction Report: Documents successful corrections.
- TR160 Short Code ID Error Report: Lists erroneous correction attempts.

Feedback

- Successful corrections are marked with "Type of Event" value "1 = corrected" and "Correction Origin" values "HM - Historical Final Missing Correction", "IL - Incorrect Long Code Correction".
- Errors are documented with specific error codes for easy identification.

Continuous updates and monitoring

- Corrected Short Codes are excluded from subsequent TR170 and TR171 reports, daily report provision starting June 2, 2025.
- Regularly review feedback reports to ensure all corrections are processed accurately.
- In case of missing reporting data, please reach out to our support teams to discuss the case and how to proceed.
